

Erika K. Johnson, MHA

Director, Strategic Research & Analytic Services
University HealthSystem Consortium

Erika Johnson directs major economic research initiatives at UHC focused on measuring the financial impact and identifying strategies to help academic medical centers (AMC) respond to the rapidly changing health care delivery system. She works regularly with AMC senior executives throughout UHC's membership on original strategic research and facilitates performance improvement through best practice identification and member networking. Erika is also responsible for management and oversight of analytic services, including providing diagnostic tools to assist AMCs in the area of revenue enhancement and clinical portfolio management.

Prior to joining UHC, Erika worked at the University of Michigan Health System where she was involved in executive level projects related to clinical operations, medical education, and research working directly with the Hospital's CEO and the Medical School's Executive Associate Dean. She has also held various positions with other teaching hospitals in the Southeast Michigan area. Erika holds a Bachelor of Science in Biology and a Master of Health Services Administration (MHA) from the University of Michigan.
